

Roni Kolukisayan

Student

I enjoy seeing, wandering and exploring, analyzing, experimenting, questioning, and trying to dig through accepted inferences by filtering them. As I am a constant learner, I can adapt quickly. I love to carry out brand-new exciting projects and to produce ideas that I think are always risky. In this way, I continue to be competent in many areas. I already have a "phrased" vision: To produce computational solutions to modern scientific problems.
